

**QUESTIONS TO ASK WHEN HIRING A  
WELDING & FABRICATION COMPANY?**  
(Provided by Mountain Man Welding and Fabrication, Inc.)

Before you hire a welder or a welding and fabrication company, it's important to ask a few questions to make sure they're the right fit for the job. We've put together a few questions below to help you get started.

- 1) Do you have a welding procedure qualified for my project?
- 2) Are your welders certified under the welding procedure applicable to my project? If so, are their certifications current?
- 3) What work have you performed that is the same or of a similar nature to my project?
- 4) Is your equipment in good working order and suitable for this job?
- 5) Who have you worked for recently and in the past? Check references!
- 6) Do you warranty your work?

If you'd like more advice on how to hire the right people for the job, contact us by calling **303-798-6822** or emailing us at [mmwf@mountainmanwelding.com](mailto:mmwf@mountainmanwelding.com).
